

An illustration of a suburban backyard. In the foreground, a house with a grey roof and a chimney is visible on the left. A paved patio area is in the center, featuring a black and white striped patio umbrella, a small round table, and two orange chairs. A white picket fence surrounds the patio. In the background, there are trees and a clear sky with three birds flying. The title 'OUTDOOR COOKING' is written in large, bold, orange letters across the top.

OUTDOOR COOKING

*...the
flameless
Electric
way*

COOK COOL

**on your porch, patio
or in your yard!**

Just plug your favorite Electric cooking appliances into a convenient outlet. You get instant heat for clean flameless cooking that keeps the "chef" cool.

Day or night, a "cook out" is easy, the Electric way. Even if a rain storm threatens, it won't spoil the party. Just move indoors and cook-away.

Electric cooking with your portable appliances is most economical at PEPCO's low household electric rates.
